

Bernard PAQUET, born in March 1960 in Belgium, makes his studies for Industrial Engineer in electric/electronic at the High School for Industrial Engineers in Liège (B). After receiving his master of electronic, he works as project engineer in domains like digital imaging techniques for security applications and non destructive controls for industrial applications. Since 1989, he is active as researcher at CENTEXBEL, the scientific and technological partner for Belgium textile industries. He participates in many developments of special measuring instruments with integrated opto-electronics and acts as technological consultant. He is now active in applied textile research related to smart textiles, in national and European projects such as OFSETH (Optical Fiber Sensors Embedded into technical Textiles for Healthcare).
